InfoSign Media launches animated capsules for ServDentist™ Clip

Chambly, September 20, 2011 – InfoSign Media, an integrated service business offering digital media networks communication solutions, is adding to its portfolio a new series of animated clips, ServDentist™ Clip. These educational 2D and 3D clips allow dental clinics to optimize their websites. Available in PC format and compatible with iPad and iPhone, these clips are now offered in high resolution, resulting in better visibility and easier readability.

Dental professionals can select and integrate into their Websites from a choice of over 50 dynamic clips. These newly developed clips help clients to better understand and visualise the treatments that are offered to them.

About InfoSign Media

InfoSign Media is a global service provider developing digital media networks communication solutions. Well-known for its unique approach and the quality of its contributions, InfoSign Media proposes ready-to-go digital signage solutions, with specialized content, that are both dynamic and interactive. With more than 400 projects, InfoSign Media offers businesses of all sizes a privileged opportunity to communicate with their clients and employees while providing them with modern communication solutions which are simple, efficient, and which visibility improves positioning, economy and customer service.
