

InfoSign Media launches Cloud Version of ServDentist SOLO Patient Education Software

March xx, 2013, Montreal, Quebec: InfoSign Media, the leading provider of networked digital television content for dental offices has announced a new cloud Version Patient Educational solution for OP rooms.

ServDentist Solo is an interactive and on-demand educational tool designed for treatment rooms and available through an Internet connection. With ServDentist Solo, dentists have access to more than 110 information clips from any desktop, laptop or tablet computer in their offices.

Topics include general and esthetic dentistry, dental surgery, prevention, prosthodontics and orthodontics. ServDentist™ Solo also includes over 50 abbreviated video clips of 10 to 45 seconds in length that explain the most common practices to patients.

InfoSign Media is making ServDentist Solo available on a free trial basis for 30 days.

“We felt making ServDentist available via the cloud was a logical step in the development of the product and the service. We think our dental customers will respond enthusiastically”, said Yves Corsi, President of InfoSign Media.

Added features of ServDentist Solo include email capability so dentists can send animated clips of procedures to patients. New 2D/3D information clips and features are updated regularly over Internet.

About InfoSign Media

InfoSign Media offers visual communication solutions designed specifically for the waiting and OP rooms and web sites of dentists, orthodontists and denturists. Well-known for its unique approach and the quality of its contributions, InfoSign Media produces and distributes ready-to-go, digital TV signage, with dynamic and interactive content. With more than 500 projects to its credit, InfoSign Media works closely with its clients and partners to offer innovative visual communications solutions.
